As Benjamin Franklin once said, "an investment in knowledge always pays the best interest." That is why we have created an e-learning system that will not only help you develop your programming skills, but will also encourage you to be consistent and stay motivated till the very end of the course. We are absolutely sure that the knowledge you gain with us will benefit you both in your academic endeavors and in your professional career.

Module tests

All the courseware and all the chapter assessments will become available from the moment you sign up and select the course you are interested in. The first chapter assessment will remain active exactly two weeks from the moment you start doing the desired course. All the subsequent chapter assessments will be locked every consecutive seven days, which means that at the start you have two weeks to complete the first chapter, at least three weeks to complete the second one, at least four weeks to complete the third one etc. The best and most recommended practice is, therefore, to take chapter assessments on the same day every week and study consistently and systematically.

Course timeframe

How you can go about your course:

1. **1st week/2nd week:** Study for the first module test.
2. **2nd week/3rd week:** Pass the first module test and get prepared for the second module test.
3. **3rd week/4th week:** Share your progress with your friends on Facebook! Keep doing this after each test!
4. **6th week/7th week:** A good moment to find out where the nearest Pearson VUE Test Center is and to start thinking about the certification exam date.
5. **9th week/10th week:** Time to start studying for the Final Mock test. A good moment to start getting prepared for the Final Test.
6. **10th week/11th week:** Time to study for the Final Test. Remember, you must pass with a grade of 70% or more. If you score below 70%, the assessment will remain active for the next week. You can take this test up to three times.
7. **12th week:** Right after successfully passing the Final Test and completing the course, you can request a 50% discount voucher for the PCAP, CPA or CLA exam to be used in one of the 5,000 Pearson VUE test centers worldwide. You need to schedule your exam and take it as soon as possible, because the process of forgetting has already begun. Revise the materials and take the exam. Don't forget to drop us a line and give us your feedback about our courses. We will also be more than happy to hear from you after the exam. Let us know how it went!

Scoring

Your goal is our goal, and that is why we want to help you as much as we can to pass the certification exam at a Pearson VUE test center. We at OpenEDG want to make sure that you are motivated enough and that your progress is being recognized. We want your learning experience to be as enjoyable and as rewarding as possible!

If you score 80% or more in a module test, you should be very happy with your progress. It is also a sign to you that you are doing well in the course. Three stars will appear above your assessment point on the course timeline.

If you score 70%–79% in a module test, you will see two stars above the assessment point on the course timeline. If you score 60%–69% in a module test, you will get one star. This indicates that in both cases you are doing well and there is no need to take the test again. However, it will remain active for the following week so that you can re-do it if you wish.

If your score is below 60%, we strongly advise that you try to study more in order to be well-prepared for the final test and the certification exam, and take the module test again. Even though you are not required to take it again, we encourage you to do so. That is why you have the option of taking each module test three times.

Discount Voucher

Please remember: You can only request a discount voucher for the PCAP, CPA or CLA exam at Pearson VUE provided you have taken all module tests on time, as indicated on the schedule. Just remember – the final reward (a 50% discount voucher) does not depend on how well you do on module tests but on how systematic you are.

To be eligible for your exam discount, you need to take module tests on time no matter what. Failing to do so results in no discount voucher for the Pearson VUE certification exam. Therefore, the purpose of the system is to make you read the set materials every week, get ready for a module test, and check if you have understood the given module.

After you have covered all the modules and taken all the module tests as well as the Final Mock Test, the Final Test will stay active in the last week of your course. **The final score counts: if you score 70% or more in the final exam, you will be issued a voucher for the professional exam at a Pearson VUE Test Center.** If your score is below 70%, you will still get a second go. Remember, you can do the self-learning course again, but you will only be entitled to the voucher the first time you take the course. Therefore, systematic work and success in module tests are important.
